

# **Seven Consulting Regulatory Compliance**

**Australia's Best Program Delivery Company** 

Official Partner of the

## **Seven Consulting - Services**

#### 1. Program Delivery

We deliver some of Australia's most complex and challenging agile, traditional and hybrid programs. We work with our clients to understand their organisational and program characteristics. These inform how we design our delivery approach to produce the best outcome for our clients. The majority of our Consultants are scaled agile (SAFe) certified and we have over \$3bn of Agile and traditional Programs under direct management.

#### 2. PMO Services

We provide PMO establishment and management, PMO analyst and scheduling services, and tools for some of the largest organisations in Australia.

### 3. Delivery Consulting

We provide delivery capability uplift, sponsor and project manager training, portfolio and program reviews to assist our clients improve their program delivery.

#### All of our clients are reference sites

## **Our Clients**

Seven Consulting has a proven track record delivering critical outcomes for Australian organisations across industries and domains. 100% of our clients are reference sites.

"Highly professional staff, great support from the broader organisation. Clear about what they are good at and stick to this"

#### **Staff Satisfaction Survey Results**

Survey Date	Satisfaction rating
Jun'20	98.51%
Dec'19	98.30%
Jun '19	98.82%
Dec '18	96.44%
Jun '18	96.40%
Dec '17	97.50%

## How do we get 98%+ client satisfaction?

### Why all our clients are reference sites.

Hands-on ownership

High staff engagement, low turnover with **no** contractors

At a minimum, there is monthly Quality Assurance review of the consultant's work, done by either the Founder, Managing Director or PMO Practice Lead

Bench support available to all consultants at no cost to the client

Extensive mentoring and training support, strong IP and knowledge sharing

Holiday and sick leave cover for assignments

Strong in-house tooling to support consultants, clients and quality assurance

## How our values impact our delivery?

#### **Teamwork**

Teamwork has to be at the core because you can't deliver big projects without great teamwork – we focus on ensuring that the Seven team, the client team and vendors work seamlessly together.

**Transparency** 

Assumptions and poor communications kill projects, whereas openness is the foundation of good relationships and reliable delivery. We remain a completely independent consultancy.

#### **Delivery**

A focus on outcomes focuses the team and grows confidence. With a confident attitude, expert personnel and effective teams we always deliver to clients high expectations.

## **Regulatory Compliance**

COPYRIGHT – SEVEN CONSULTING 2020 – ALL RIGHTS RESERVED

The cost of non-compliance is significant (both financial penalties, loss of trust and reputational damage) and in some cases prohibitive (loss of license to operate). As new legislation is passed, organisations are increasingly faced with pressure from the regulators to comply with new the legislation in compressed timeframes and at significant cost to the organisations.

This capability statement outlines considerations across a variety of compliance obligations for companies spanning banking, payment, utilities and Consumer goods. It summarises Seven Consulting extensive experience in the area and high lights examples of how we can and are assisting clients in meeting their obligations.

Faced with high demand for change, constrained project budgets and a changing compliance landscape, we have seen business struggle to ensure the process and systems controls needed are in place and robust. Increased reliance on technology to meet compliance obligations had introduced a greater risk of systemic failure resulting in large volumes of non-compliance. Compliance program funding competes with other investment opportunities that often have strong projected financial or customer satisfaction returns. But similar to public investment often the full impact of non-compliance is not factored in when funding is allocated.

Regulator attitudes and public opinion has dramatically shifted in the past years and companies have come to realise that non-compliance is not an option. The real cost of non-compliance have been laid bare and they are broad. Negative consumer sentiment, significant reductions in market capitalisation, remediation costs, executive and board turnover and in extreme cases companies shutting down have all been outcomes from not taking compliance obligations seriously. This has raised pressure on companies to successfully and rapidly deliver on compliance obligations and play their part in society in a more responsible way.

This creates a need to think about meeting compliance obligation as part of everything the company does wherever this is possible, not as a separate activity.

## How are compliance programs viewed?

Based on our considerable experience in compliance projects, Seven Consulting would offer the following observations on how organisations view their compliance portfolios.

First, Regulatory and Compliance programs have a very important but often ignored "image problem" within project management and delivery communities:

- They are perceived by many people as having no real benefits
- They are generally exposed to higher levels of change and uncertainty as regulators refine their legislation
- They typically involve working with at least some old, poorly maintained "legacy" systems
- They are not seen as important as some "cool" new customer-facing projects
- They rarely involve and leading-edge or innovative technology
- They are often seen by senior management as a burden rather than an opportunity
- They are not perceived as great career-building opportunities

These perceptions add an additional layer of organisational and people-related complexity to already complex projects. Our advice:

- Take them seriously
- Invest in them properly
- Prioritise them at or near the top of your list

COPYRIGHT - SEVEN CONSULTING 2020 - ALL RIGHTS RESERVED

- Execute them to high standards
- Ensure active "C-Level" governance

Not doing so introduces a very real and significant risk of organisations losing their 'social' license as was seen with financial services during the Royal commission.

## There need to address compliance in two ways:

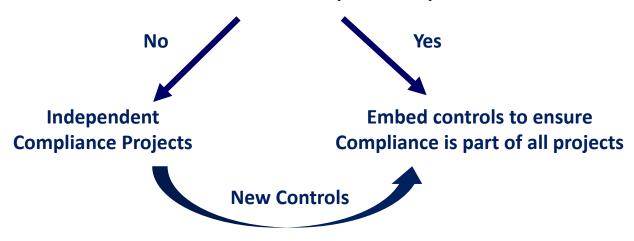

To ensure compliance costs don't become an unreasonable financial burden it is important that we look to address compliance within existing projects unless new requirements emerge that require additional focus.

Through the enterprise portfolio ensuring that all programs and projects have compliance at the core, designed appropriate controls and quality assurance to ensure that as the business changes it maintains or enhances it's level of compliance.

When new compliance obligations are identified robust assessment is needed to assess the most efficient mechanism to reach compliance. This could be achieved through adding scope to existing projects and programs or creating stand alone projects and programs with the sole focus of reaching compliance.

## **New obligation**

#### Can it be addressed within portfolio spend?

## The Banking Royal Commission

The Royal Commission into Misconduct in the Banking, Superannuation & Financial Services Industry, also referred to as the "Hayne Report".

#### **Background:**

On the 14 December 2017 Commissioner Kenneth M Hayne was instructed to conduct a commission into the misconduct in the Banking, Superannuation and Financial Services industries. The central task of the Commission was to inquire into, and report on, whether any conduct of financial services entities might have amounted to misconduct and whether any conduct, practices, behaviour or business activities by those entities fell below community standards and expectations.

Steps were taken to gather submissions and information from the public. The public submitted more than 10,000 complaints about financial services entities. Three rounds of public hearings were conducted:

- 1. The first concerning superannuation (between 6 August 2018 and 17 August 2018),
- 2. the second concerning insurance (between 10 September 2018 and 21 September 2018), and
- 3. the third (between 19 November 2018 and 30 November 2018) took evidence from CEOs, board chairs and the heads of ASIC and APRA.

An Interim Report was submitted to the Governor General on 28 September 2018. A final report was published was published on the 1<sup>st</sup> of February 2019. The full report can be read here: <a href="https://www.royalcommission.gov.au/sites/default/files/2019-02/fsrc-volume-1-final-report.pdf">https://www.royalcommission.gov.au/sites/default/files/2019-02/fsrc-volume-1-final-report.pdf</a>

Commissioner Hayne's final report made 76 recommendations and 24 referrals for potentially criminal conduct. The findings called for major reforms in the culture, governance and remuneration structures of the banking industry.

COPYRIGHT – SEVEN CONSULTING 2020 – ALL RIGHTS RESERVED

## The Banking Royal Commission – Key findings

The Royal Commission concluded that many entities had systematically conducted business that financially benefited the entities at the cost of the clients they were serving, often breaking the law with little or no recourse.

A very high-level summary of the findings is that the conduct identified and described in the Commission's Interim Report and the further conduct identified and described in the final Report included conduct by many entities that took place over many years causing substantial loss to many customers but yielded substantial profit to the entities concerned. Some of the conduct broke the law. Those entities that broke the law were not properly held to account. And if it had not broken the law, some of the conduct fell short of the kind of behaviour the community not only expects of financial services entities but is also entitled to expect of them.

#### **Key findings included:**

- A strong alignment between product sellers and product manufacturers, resulting in cross-selling of products and conflicts of interest
- Low transparency with and respect for customers, and making the best interests and objectives of the customer secondary to those of the financial services provider
- Boards and senior management focusing on their best interests (or to the benefit of shareholders) to the detriment of customers
- A lack of voice and accountability in identifying, escalating and dealing with risk and compliance issues
- Significant cultural and leadership issues exhibited across the industry which Senior Executives and Boards have either failed to influence or failed to manage and address

# Example Compliance Obligations & Seven Consulting's experience

## Banking Royal Commission – How Seven Consulting can help

Based on our considerable experience in compliance projects, Seven Consulting can help organisations plan and execute regulatory and compliance programs set up to address the recommendations of the Banking Royal Commission.

Cons	sider the Macro level considerations:	Seven Consulting's value proposition:
1.	Separation of Duties  a) Changes to organisational structures  b) Changes to roles and accountabilities	Extensive experience in helping organisations define new target operating models considering the various aspects that define success, and then running programs to successfully implement the changes. (Ref our experience 18-21)
2.	Product set changes  a) Removing and migrating off products  b) Introducing new compliant products	Extensive experience in working with the business to define and build target state business capability and successfully migrating significant amounts of highly complex data to the new systems (Ref our experience 18-21)
3.	a) To remediate system and process issues b) To eliminate complexity c) To implement new controls d) Implement automated risk & compliance reporting	Extensive experience in consolidating legacy systems to remove duplication and unnecessary complexity, or building either bespoke or OOTB target state solutions.  (Ref our experience 18-21)
4.	Resilience built into current and future systems	Extensive experience in building resilient, future-proof solutions (Ref our experience 18-21)

## **Anti Money Laundering (AML)**

Enhance, implement and test new AML systems

AML/CTF regulations set by AUSTRAC requires corporates to make sure they adopt a risk-based and principles-based approach to regulation and places the onus on reporting entities to identify, mitigate and manage their ML/TF risk, comply with AML legislation, frequently report on any suspicious activity to fight money laundering

Consider the Macro level considerations:		Seven Consulting's value proposition:
1.	Creation of Risk Framework  a) Define AML risk assessment framework  b) Define AML risk scoring approach	Extensive experience in working with businesses to define risk assessment framework and risk scoring approach to direct regulatory efforts towards vulnerabilities and high-risk entities (Ref our experience 18-21)
2.	<ul> <li>Define AML processes, governance and reporting</li> <li>a) Create/reengineer AML processes and SOP (Standard Operating Procedure)</li> <li>b) Define AML governance model and operating rhythm</li> <li>c) Define AML roles and responsibilities</li> <li>d) Define AML reporting requirements</li> <li>e) Train staff on new AML processes</li> </ul>	Extensive experience in leading businesses to define or reengineer their AML processes, create SOP's, define and implement operating models with roles and responsibilities, define AML reporting requirements, train staff and successfully transition to the new operating model to prevent future non-compliance, and ensure that businesses meet their AML obligations (Ref our experience 18-21)
3.	Update AML systems  a) Review new AML requirements	Extensive experience in leading AML system requirements review and enhancing / implementing AML systems to help detect and report suspicious activity including the predicate offenses to money laundering

(Ref our experience 18-21)

## **Energy Trading – 5 Minute Settlement**

On 28 November 2017, the AEMC made a final ruling to reduce the settlement period for the electricity spot price from 30 minutes to 5 minutes, starting in 2021\*. This change requires the collection, storage and delivery of revenue metering data, to be based upon 5-minute intervals for use in energy settlement, network and retail billing.

Camaidan Ha	NA	d considerations:
I ANSIMAL THE		il considerations:

#### 1. Upgrading IT Systems to store and process 5MS

- a) Changes to Core Trading and Reporting systems (i.e. Billing, Pricing, Risk, and others)
- b) Boosting Data Storage capabilities to report and store increased data points
- c) Updating integration and system testing with external providers

#### 2. Upgrading Metering to provide 5MS data

- a) Analysis of current Metering capabilities and required remediation
- b) Upgrading or replacing impacted Metering Hardware

#### 3. Updating Contract T&C's and Operating Processes

- a) Updating of current and future contractual T&C's (Terms & Conditions)
- b) Changes to product offerings and review of future product roadmaps
- c) Review current Operating processes and remediating impacts

#### 4. Review of current and future investment opportunities

- a) Review and realignment of current investments to match industry changes
- b) Review of new industry investment opportunities stemming from 5MS disruption

#### Seven Consulting's value proposition:

Extensive experience in running system gap analysis and establishing solution roadmaps. Extensive experience in consolidating legacy systems to remove duplication and unnecessary complexity. Significant experiences with implementing tech capability uplifts.

(Ref our experience 18-21)

Extensive experience in running large scale remediation programs of works including regulatory compliance works.

(Ref our experience 18-21)

Experience working with the business to define and build target state business capability. Extensive experience in successfully migrating highly complex workflow to target state with minimal impact to operations (Ref our experience 18-21)

Extensive experience in establishing Benefit Realisation Frameworks and setting up governance processes for Final Investment Decision (FID) (Ref our experience 18-21)

\*AEMC Timelines currently under review due to COVID impacts. Some requirements are expected to be shifted to 2022

## **European Data Privacy – General Data Protection Regulation (GDPR)**

Introduction of European Union General Data Protection Regulation (GDPR) in 2018 requires any Australian business established in Europe, or dealing with European customers or their data to comply with this privacy law. The implication stems from the requirement of implementing measures ensuring compliance with a set of privacy principles and taking a 'privacy by design' approach.

Consider the Macro level considerations:		the Macro level considerations:	Seven Consulting's value proposition:
1. Establishing Information Data Governance		lishing Information Data Governance	Extensive experience in working with clients in establishing and running
	a)	Implementation of strategic information governance framework	large-scale governance programs in response to changes in the compliance environment and increased oversight by the respective industry regulation bodies
	b)	Coordinated implementation of unified information policies and procedures, including information security	(Ref our experience 18-21)
	c)	Enhance contractual compliance by contractors and sub- contractors handling the data	
2.	Chang	ges to data processing landscape	Extensive experience in helping organisations to drive discovery and
	a)	Implementation of required data processing, protection and monitoring mechanisms following the 'data protection by default and design' principle	capturing compliance requirements and translation of those into solutions bringing together people, processes, technology and data (Ref our experience 18-21)
	b)	Changes to traceability and security	
	c)	Implementation of new controls over data transfers	
	d)	Implement automated risk & compliance reporting
