SEVEN CONSULTING  
**OPALS**

TEAMWORK • TRANSPARENCY • DELIVERY

## Program Delivery

We deliver some of Australia's most complex and challenging agile, traditional and hybrid programs. We work with our clients to understand their organisational and program characteristics. These inform how we design our delivery approach to produce the best outcome for our clients. The majority of our Consultants are scaled agile (SAFe) certified and manage billions of dollars of transformation programs that range in size from <\$1m to >\$500m.

## PMO Services

We provide PMO establishment and management, PMO analysis and scheduling services, and tools for some of the largest organisations in Australia. This can range from scheduling services, to running the PMO for \$1.5bn programs, to ePMO management.

**All of our clients are reference sites**

## Change Management Services

We provide program change management, adding value from the start of an initiative through to realising benefits. We also support the integration of change management at an enterprise level to improve portfolio performance.

## Delivery Consulting

We provide delivery capability uplift, sponsor and project manager training, portfolio and program reviews to assist our clients improve their program delivery. We have successfully provided these services to over 50 clients.

## Delivery Tools

Seven Consulting has designed and developed world leading tools to assist our clients optimise their portfolio, design their delivery approach and provide deep weekly delivery insights. These tools are used successfully on over \$5bn of Programs annually.

**All of our clients are reference sites**

# Our Clients

*Seven Consulting has a proven track record delivering critical outcomes for Australian organisations across industries and domains. 100% of our clients are reference sites.*

"The team from Seven has integrated effectively with IVC and shows they understand the business."

"Seven is one of the most prestigious consultancies in Australia and most of the Seven Consultants I have come across at my current and previous organisation prove that."

"Strong program delivery capability with the flexibility to scale up and down quickly to meet program and business needs. Look to continue to bring the best of the Seven ecosystem to clients to demonstrate the value-add."

"Good people and a focus on support from the central organisation when required."

alintaenergy

"Very happy with the level of organisation and governance the Seven project/program managers bring to our more complex initiatives."

Commonwealth Bank

"Every Seven consulting person I have ever worked with has been very good at what they do."

# How do we get to 98+% customer satisfaction?

## People

- 100% permanent workforce, tested extensively through a robust recruitment process.
- High employee engagement.
- Hands on owners that have delivered major programs.
- Training allowances and internal learning sessions.
- Comprehensive mentoring.
- 95% SAFe® qualified and internal trainers.

## Process

- Regular structured quality assurance of all assignments.
- Weekly review of all assignments' status.
- Industry leading Customer Satisfaction and NPS management.
- Bench support available at no cost to client.
- Holidays and illness cover for clients.

## Tools

- Dedicated project tools team.
- Program Delivery approach designed with Pathfinder.
- Delivery approach risks defined with Pathfinder.
- Schedule integrity measured with Healthcheck tool.
- Project reporting with dashboards and scorecards.
- Portfolio optimisation tool.

**All our clients are reference sites.**

# How our values impact our delivery?

## Teamwork

Teamwork has to be at the core because you can't deliver big projects without great teamwork.

We focus on ensuring that the Seven team, the client team and vendors work seamlessly together.

## Transparency

Assumptions and poor communications kill projects, whereas openness is the foundation of good relationships and reliable delivery. We remain a completely independent consultancy.

## Delivery

A strong emphasis on outcomes focuses the team and grows confidence. With a confident attitude, expert personnel and effective teams we always deliver to our client's high expectations.

# Cyber Security Background

On 18 June 2020, the Australian Prime Minister announced in a national press release,

*“Based on advice provided to me by our cyber experts, Australian organisations are currently being targeted by a sophisticated state-based cyber actor.*

*This activity is targeting organisations across a range of sectors, including all levels of government, industry, political organisations, education, health, essential service providers and operators of other critical infrastructure.”*

In 2016, **3 billion Yahoo accounts** were hacked in one of the biggest breaches of all time.

In 2017, **147.9 million consumers** were affected by the **Equifax Breach**. The Equifax breach cost the company over \$4 billion in total.

In 2020, companies such as **BlueScope, MyBudget, Toll Group and Services New South Wales** have all been **hit** by cyber security attacks.

According to the [Centre for Strategic and International Studies](#), **Australia was the sixth most hacked country in the world**, with 16 major cyber attacks in the period between May 2006 and June 2020.

## COUNTRIES WITH THE MOST “SIGNIFICANT” CYBER-ATTACKS - 2006 to 2020

**Damage related to cybercrime is projected to hit \$6 trillion annually by 2021.** ([Cybersecurity Ventures](#))

# Framework to build Cyber Security Protection

One widely endorsed standard for building cybersecurity - the US National Institute of Standards and Technology (NIST) Cyber Security Framework -

- focuses on business drivers to guide cybersecurity activities
- considers cybersecurity risks as part of the organization's risk management processes
- enables organizations – regardless of size, degree of cybersecurity risk, or cybersecurity sophistication – to:
  - apply best practices and principles of risk management to improve critical infrastructure security and resilience .
- provides organization and structure to today's multiple approaches to cybersecurity by assembling standards, guidelines, and practices that are working effectively in industry today.

The Framework is **not a one-size-fits-all** approach to managing cybersecurity risk for critical infrastructure. Organizations will continue to have unique risks – different threats, different vulnerabilities, different risk tolerances – and how they implement the practices in the Framework will vary.

# Building Cyber Security protection

Seven Consulting has been engaged on Cyber Security Transformation Programs for some of Australia's largest organisations across Retail and Financial Service organisations.

Successful Cyber-Security protection depends on effective, co-ordinated Program Implementation across multiple workstreams

Assess

Plan

Implement

Manage

Board commitment and Governance

Cyberthreat mitigation planning

Establishment of leadership responsibilities

Threat assessment/maturity

Systems and asset vulnerability assessment

Network/systems design & implementation

Threat monitoring systems and behaviours

Process and data management

Integration of physical and cybersecurity

Cybersecurity training

Detection, eradication and recovery processes

Response planning

Regulatory obligations and legal considerations

1. Securing Board and Executive commitment
2. Staffing Cyber Security Resources – it is difficult to finding the right resources with the right skills in Cyber Security
3. Operational resources lack the capacity to support the projects. Inter-departmental resistance to collaboration
4. Accuracy of Asset Management information and ownership.
5. While implementing and standing up a services is fairly straight forward, the rollout to all servers and applications is a long tedious process. (Decommissioning legacy services)
6. The Procurement Process for new Cyber Security tools takes longer than expected.
7. Global Cyber Service providers don't have the skills on shore to deliver their products. Visas are also harder to get now.
8. Implementing a secure environment for BYOD. Developing instruction manuals for BYOD.
9. Data integrity in & across our various systems (Identity Management)
10. Very limited reference documentation on As-Is processes, leading to gaps in requirements analysis - We only know as much as we are told.

# Seven Consulting's Program Mobilisation Cyber Security

---

Major Sponsor of the

CommBank  
**MATILDAS**

SEVEN CONSULTING  
**OPALS**

Effective mobilisation of a Cyber Security Program is critical to improving the likelihood of a program's success. Often there are questions and uncertainty about how a program will be delivered and by whom, especially when working in complex organisations with network or virtual team resourcing models. Running a structured mobilisation phase will answer these questions and ensure the program has what it needs to deliver effectively.

*Seven Consulting's program mobilisation service will bring qualified practitioners and a structured process to ensure that your Cyber Security program is set up for success from the beginning.*

- Our experienced practitioners engage with a broad range of stakeholders to ensure we have fully understood the program objectives and the enterprise delivery capability.
- Key artefacts will be reviewed against our own best practice benchmarks to investigate all areas that may affect success.
- Industry best practice capability frameworks will be used to drive the design of your program structure with the right program management processes and tools.
- We collaborate closely with your team to verify our findings and make sure our recommendations are practical and achievable.
- Our PMO and governance toolsets will create robust plans and schedules for successful execution.
- We will bring our experience of delivering programs across some of Australia's most complex companies, spanning different industry groups and technology domains, to find the most effective model for your enterprise.
- Your internal delivery capability will be independently assessed by our team and factored into the program resource strategy.
- The Seven team will leverage our depth of experience in vendor management to provide valuable input into vendor sourcing and contracting.

It starts with a clear strategy and clear understanding of:

- What you deem to be your key assets that require protection
- The risks that these assets face
- The threats you determine could expose your assets to a cyber attack
- The risk mitigation steps you are putting in place to address those risks.

**Risk**

Initiatives

**Threats**

A top down approach to define the organisation aggregated Cyber Security key risks. A bottom up approach to determine the threat analysis with controls. This then allows the program initiatives and program roadmap to be developed.

# Program Mobilisation Approach

Once the program initiatives are defined then Seven Consulting's approach to program mobilisation is started for each project. This includes Discover (the scope, objective and benefits), Design (the structured define the baseline) and Deploy (the team, processes and tools to deliver the program).

## Discover

Establish the program scope, objects and benefits

Program core team will have a holistic view of the enterprise and the intended change to enable an effective mobilisation.

## Design Approach

Design the target state program structure and based on this define the initial program baseline. Deliver the core project management governance artefacts for the program.

Agreement between the key stakeholders and the program leadership on the program approach, structure and governance with the first view of the program plan.

## Deploy

Establish and build the team, processes, tools & forums to successfully deliver the program.

An effective and engaged team backed with clear plans as well as the right governance, processes and controls to drive success for the next phase of the program.

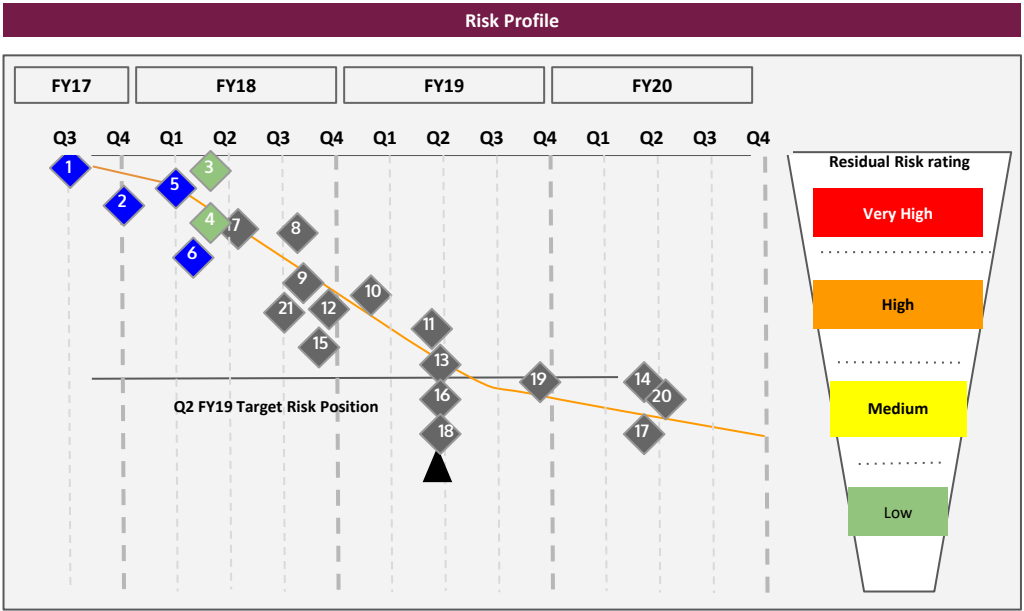

# 1. Identity and Access Management Risk (example)

For each risk identified, a mitigation strategy is created to reduce the Risk rating over the time of the program.

|                              |           |                             |        |                           |
|------------------------------|-----------|-----------------------------|--------|---------------------------|

# Cyber Security Program

***Implement Cyber Security Strategy across all seven Woolworth brands and Worldwide locations***

The Woolworth Every Byte Counts Security Program objective was to deliver a new Information Security Strategy to address the security challenges facing Woolworths. Every Byte Counts aimed to build a solid foundation for a stable information security program within Woolworths. In broad terms the objectives of the strategy are to Protect Brands and data, Enhance business confidence, Govern security effectively, Cybersafe @work and Cyber aware culture. A 4 year \$50m Program Roadmap was created with projects being grouped into 4 streams of work. 1 Security Management and Governance, 2. Architecture and Technology 3. Identity and Data 4. People.

The Seven Consulting team was engaged to provide the Program Director, multiple project managers and PMO services to implement and coordinate the various IT Applications, IT Infrastructure, the Security Operations Centre and Business communications and change management to ensure the overall program success.

Seven Consulting successfully provided program leadership and structure to ensure:

- ✓ Delivery of 28 projects to modernise Woolworths security tools and processes over a 4 year period.
- ✓ Created the Security Operations Centre (physical team space, testing lab, hardware, software and all security processes)
- ✓ Ability to respond to a cyber-attack and report any privacy data breach.
- ✓ Resource Management - Staff Joiner, Mover, Leaver process and user access reviews modernised and automated
- ✓ 11 Cyber Risks mitigated to reduce the risk profile from very high to medium

# Security and Identity Management

## *Cyber Security Identity Transformation*

Program Silk was Macquarie Banks strategic Identity and Access Management (IAM) program across process, people and technology. Covering several different entities at Macquarie as per the strategic roadmap and in collaboration with both internal groups and external strategic partners across both business and technology areas. This complete transformation is a journey that will take several years. Priority will be on building sustainable processes and solutions that can be replicated at scale.

Seven Consulting was engaged to perform the program management role for the initial concept phase of the Program. Developed the Strategic Plan and Roadmap by defining the Scope of Objectives, Outcomes and Outputs to build the business case for delivery funding. Created the operating model of the program by defining the Steering Committee and team structures of the IAM program to deliver the capabilities that allow the business to onboard to a service that will ensure that the right individuals and assets can access the right resources at the right times for the right reasons. This included the foundational Build of core IAM Platform and functionality to support the UAM future state. Human-Centred Design User Experience to uplift the User Experience (UX) of the platform. Change and Transition management as well as Application on-boarding.

- ✓ Enablement of business strategy: Supports and facilitates the realisation of the wider business strategy
- ✓ Commercial benefits realisation: Supports Macquarie's commercial goals by achieving efficiency and enhancing productivity
- ✓ Clear and effective governance and operating model: An operating model with clear roles and responsibilities across people, process, and technology is in place
- ✓ Manage regulatory and compliance obligations: Enables Macquarie to meet its obligations under global regulatory regimes in a cost-effective manner

# Security Remediation

**EQUIFAX**

## *Securities Remediation Program and Financial Tracking*

Equifax is a data analytics company and a global leading provider of credit information and analysis, including within Australia\New Zealand. After the US division had been impacted by a serious data breach that compromised the personal information of their consumers, a global initiative to identify vulnerabilities and implement remediation solutions was initiated. Program Sierra was an aggressive security upgrade program to protect consumer data and computer systems in Australia and New Zealand from theft and damage to hardware, software and information.

Seven Consulting provided Program Delivery management and governance to direct and manage the \$100+ million program across the Australia and New Zealand products, processes and systems over an 18 month period. This program prioritized the implementation of priority controls that protected and monitored the entire environment, as well as implementation of application specific controls across the 500+ products within Equifax. This covered Data Protection (retention, encryption, class 5 access, data use), User Management and access controls, PCI compliance, Cyber Security, Application\Server and Network monitoring and patching, Infrastructure protection including process, physical access, web access firewalls.

The scale of this program and the complexities of deliveries required an uplift in the Equifax program governance processes through the team which often drove improvements back into the EPMO, particularly around milestone and financial tracking.

- ✓ Estimation finance model was designed specifically for the Remediation program with ability to monitor spend at functional level.
- ✓ Delivered 95% of controls on time and budget. Exemption agreed for 5% not able to be delivered.

# Identity and Access Management

## *Identity and Access Management*

Program Aegis replaced CBA's Identity and Access Management (I&AM) system. With a budget of 100m+, the program involved migrating the existing I&AM system onto the new target solution with the objective of providing strong identity governance and verification, timely and accurate user access and password self service and ongoing privilege management and segregation of duties. The program was broken down into multiple releases and initially delivered using an Agile delivery methodology. During the first release the program was struggling to deliver on promised outcomes putting the overall delivery of the program at risk.

Seven Consulting were engaged during the first release to provide the Program Director and Program Management Office (PMO) capability. Initially focusing on release 1, Seven's project discipline provided the Project Management Capability to get Release 1 back on schedule. The focus then turned to re-planning and prioritising the remaining scope into subsequent releases with a view to ensure these releases were achievable and delivery of business benefits were to an agreed schedule.

Seven Consulting successfully provided program leadership and structure to ensure:

- ✓ The creation of a release strategy aligning achievable timelines to business capability
- ✓ Alignment of remaining scope and budget to business benefits
- ✓ Provision of project management discipline such as RAID, schedule management and Quality Assurance
- ✓ Detailed schedule and statistical view of project reporting
- ✓ Transition from Project to Business as Usual (BAU)

# Improve Project Success Rates with Pathfinder

1. Follow a consistent approach to customise and optimise project delivery based each project's and organisation's key characteristics.
2. Reduce the level of project management oversights or omissions.
3. Identify delivery approach risks and mitigants.
4. Create a draft schedule in MS project or JIRA with streams, phases, deliverables, tasks and dependencies.
5. Enable better project outcomes.
6. All in 30 minutes or less.

• Cerebral Palsy Foundation (MNL)

**2016**  
Marian Villa (Sydney)

**2020 – DONATION DRIVE**  
Project 7 gave back to the community, by donating \$104,000 across 29 charities, enabling these organisations to create real change in the lives of those who need it most.

### 2021 – Mini Project 7

In 2021, Seven Consulting continued to acknowledge the importance of fostering a community presence. Seven Consulting team members across three cities were able to participate in multiple mini projects this year to see our Project 7 commitment through.

### 2022

• M.A.D. Woman (Melbourne) *The pencil case challenge*  
• Bahay ni Maria and Tahanan ng Pagmamahal (Manila)

# SEVEN CONSULTING DELIVERY SUMMIT

The purpose of the Seven Consulting annual Delivery Summit is to share our clients' best practice in program and project delivery. It also serves as a celebration of success and a thank you, training and networking opportunity for our clients and their selected delivery leads.

# Seven Consulting is a proud sponsor of Australia's National Football side, the CommBank Matildas and Australia's Women's Basketball team, the Seven Consulting Opals

We are extremely proud to be official sponsors of Australia's best teams. The CommBank Matildas and the Seven Consulting Opals.

We are also providing paid internships for a number of the Matildas (**Tameka Yallop**, and **Elise Kellond-Knight**), to support their post-sporting careers.

## CONGRATULATIONS

Seven Consulting looks forward to the CommBank Matildas welcoming the world to Australia and a congratulations to the Seven Consulting Opals for winning Bronze in the FIBA Women's World Cup 2022

Tameka Yallop
