Introduction to Project Management and PMO-as-a-Service

At Seven Consulting, we pride ourselves on the quality of work that we get to do for our clients. We generally work on their largest and most critical programs and have consistently received over 98% customer satisfaction.

We have also worked with some of our clients to uplift their delivery capability and build centres of project management excellence where there is the demand and management attention required to support this.

However, we find that with some clients they may not have the critical mass or the management focus to build their own capability and they end up getting uneven results across their portfolio by using a combination of permanent, vendors and sometimes mainly contractors. This materially increases the risk of cost blowouts, the lack of quality of delivery and delayed and reduced benefits.

We have introduced an outsourced PM and/or PMO offering to assist organisations get certainty around delivery for all or part of their organisation. In turn Seven Consulting can reduce its rates based on a minimum level of demand in the agreement. This creates the following advantages for the client.

- 1. Pricing can be based on pre-agreed % of overall portfolio spend. This % would be agreed in due diligence and re-assessed based on open books each year. This is turn leads to
 - i. Ability to scale up and down on demand at no extra onboarding or rightsizing cost.
 - ii. Consistency of approach and quality of resources.
 - iii. Ability to leverage resources across multiple programs.
 - iv. Quality assurance over all outsourced work.
 - v. Automatic coverage/replacement at no extra cost due to illness, leave or non-performance.
 - vi. Improved delivery performance, with material improvement of costs and benefits.

Delivery Capability Options for Consideration

1. Internal Delivery Capability

- Pros: Ability to develop mature business relationships; Delivery IP and skillset remain within the organisation; Ability to allocate best resources to highest priority projects; Improved demand management and resource allocation; Potential to reduce project lead time. Reduced daily cost.
- Cons: Needs strong delivery leadership. HR requirement including career planning and development; Limited to existing expertise and skillset, potential to become insular. Key resources may look elsewhere for growth. Difficulties in scaling down team size.

3. Ad Hoc Resourcing

- Pros: Can ramp up / ramp down capability as required; Percentage of delivery IP and skillset remain within the organisation.
- Cons: Inconsistent level of experience and exposure to business, delivery methodology and tools; Onboarding time; Limited to existing or available market expertise and skillset; Element of HR accountability. Higher daily cost than internal capability.

2. Current or Potential Future Vendor

- Pros: Depending on Service Provider, access to set level of expertise and delivery experience; Practitioners work from a common methodology and training; Outsourced HR requirement including career planning and development accountability; Reduction in project ramp up time; Optimised demand management and resource allocation.
- Cons: Delivery IP and skillset remain with service provider; Higher daily cost than internal capability. Not truly independent. Conflict of interest with other vendor responsibilities. Potential conflicts with other vendors.

4. Independent Specialist Vendor

- Pros: Depending on provider; Access to best-of-breed expertise and delivery experience; Practitioners work from a common methodology and training; Ability to allocate best resources to highest priority projects; Improved demand management and resource allocation thus potential to reduce project lead time; No HR requirement including career planning and development accountability; Delivery IP and skillset remain within the organisation for the duration of the contract.
- Cons: Delivery IP and skillset potentially leave with the delivery capability partner. Higher daily costs than internal capability

Delivery Capability Options and criteria

Criteria	1. Internal Delivery Capability	2. Current or Potential Future Vendor	3. Ad Hoc Resourcing	4. Independent Specialist Vendor
Delivery Capability	High subject to strong leadership and paying for talent	Dependent on vendor quality	Can be high subject to strong leadership and paying for talent, but will likely be high turnover leading to mixed results.	High, subject to quality of company engaged.
Cost Effectivene ss	High, if consistent level of resource requirements.	Likely to be inverse relationship to the vendor delivery capability as the low-cost vendors struggle in this space.	Medium.	High if increased responsiveness, leveraging and effectiveness. Low if these are not achieved.
Responsiveness	Can be high if you carry a bench which adds additional costs. Low regarding time for new permanent hires.	Very High if properly contracted	Low	Very High once properly contracted
Independence	High	Very Low.	High	High

Modelling criteria against the four Delivery Capability Options.

Criteria	1. Internal Delivery Capability	2. Current or Potential Future Vendor	3. Ad Hoc Resourcing	4. Independent Specialist Vendor
Delivery Capability	High, subject to strong leadership and paying for talent	Dependent on vendor quality	Can be high subject to strong leadership and paying for talent, but will likely be high turnover leading to mixed results.	High, subject to quality of company engaged.
Cost Effectiveness	High, if consistent level of resource requirements.	Likely to be inverse relationship to the vendor delivery capability as the low-cost vendors struggle in this space.	Medium.	High if increased responsiveness, leveraging and effectiveness. Low if these are not achieved.
Responsiveness	Can be high if you carry a bench which adds additional costs. Low regarding time for new permanent hires.	Very High if properly contracted	Low	Very High once properly contracted
Independence	High	Very Low.	Variable	High

What should the client be looking for?

PMO/PM Capability: Experience & proven track record in Delivery

- Successful PMO/PM Delivery Record. Proven track record and extensive reference list and very high client satisfaction.
- Ideally the delivery partner would have an Advisory capability that could play a key role in developing an assessment of your project delivery and management alternatives, including Agile practices.
- The chosen approach should improve project delivery, quality, efficiency, predictability, transparency and outcomes.

Cost effectiveness

- The proposed solution should be holistic and provide a complete PMO/PM capability with no hidden costs.
- The proposed PMO/PM capability model should not result in a net increase to the existing cost base unless adding material extra services.

Responsiveness

- The ability to assign resources. E.g. the ability to assign strong, capable PMO/PM staff within an agreed timeframe.
- The ability to replace resources. E.g. the process and ability to find a suitable alternative PMO/PM team member within an agreed timeframe.
- The ability to react and scale up or down based on demand and skill.

Independence and objectivity

 Operating as trusted business advisors with no bias or conflict of interest with respect to your other current and potential future service providers.

Quality Assurance

 Internal Quality Assurance processes within the vendor that you can rely on to get a high-quality service.

Training

 Ability to provide ongoing and relevant training to team

Mentoring

Project Management deals heavily in ambiguity and relationships and these have to be effectively managed in order to successfully deliver business outcomes. The successful partner should be providing mentoring support to their team to optimise the probability of success.

Tooling

 Client should be looking for a partner that has a track record of implementing new leading tools and retains a repository of best practice documents and artefacts.

PMO/PM Model and Service Tailoring

PMO/PM-as-a-Service

- Seven Consulting PMO/PM is an outsourced PMO/PM providing PMBOK and Agile aligned Project Management and PMO services to a portfolio of projects and programs;
- Services provided are tailored to suit the scale, complexity and risk profile of individual projects to ensure an effective and efficient level of optimisation for each project. The services are split into four groupings;
 - "Full" All PMO Services and Deliverables
 - "Medium" A subset of Services and Deliverables
 - "Lite" Minimum set of Services and Deliverables
 - "Agile" Agile set of Services and Deliverables

PMO/PM as a Service - Service Tailoring

- Tiers of Services and Deliverables will allow optimisation for each project, maximising value for money.
- At commencement, each project is put through a "triage" process to determine the level of PMO Support required. Triage parameters would include project size, complexity, business criticality, risk profile, and others.
- Based on this Triage process, each project will be designated a level of PMO support (with cost generally used as a proxy for the risk/complexity), e.g.:
 - "Full" All PMO Services and Deliverables (>\$2m)
 - "Medium" A subset of the full set of Services and Deliverables (\$0.5m to \$2m)
 - "Lite" Minimum set of Services and Deliverables (<\$500k)</p>
 - "Agile" Where appropriate and Agile trained resources available

PMO/PM-as-a-Service – Benefits

The traditional model for organisations that have implemented a project based PMO is to resource that capability per project. This generates significant wastage as resources are duplicated within each project and spare capacity from under-utilised resources is not shared.

A PMO staffed by a pool of highly skilled specialists focussed on efficiently delivering agreed PMO services to the specified service level:

- More effective PMO Analysts specialised in particular PMO functions support multiple projects, leveraging best practice across the projects.
- More efficient Resources can be shared across projects.

PMO-as-a-Service – Generic Benefits

- **1. Continuous Improvement** The PMO/PMs will identify areas for improvement and can take responsibility for updating client processes and documentation.
- 2. **Consistency** Common approach to PMO/PM functions across projects improves insights on project performance and more effective decision making.
- **3. Improved accuracy** and constant visibility of project performance will allow earlier intervention and rectification of project issues to increase "on time", "on budget" project performance.
- 4. **Flexibility** PMO/PM Services can be engaged, disengaged or changed instantly. Improved demand management and resource allocation thus potential to reduce project lead time.
- **5. Focus** PMO/PM resource recruiting, management, utilisation, training etc. is no longer a client responsibility.
- 6. **Measurable** Service Level Agreement based approaches provides metrics to measure efficiency and effectiveness of the PMO/PMs.
- 7. Shared Risk KPIs tied to SLAs linked to Service Credits ensure the PMO/PM's "skin in the game".
- 8. Best practice project management governance framework.
- 9. Ease of implementation can deploy best practice Project Management Life Cycle (PMLC) framework, processes and templates (as required).

Bundling PMO & PM Services

Benefits

- Major benefit in bundling both PMO and PM services is a single point of accountability for the successful management and delivery of the project portfolio – "one throat to choke".
- All PMO & PM resources are culturally aligned and accountabilities are clearly defined.
- Key objective is to deliver change more rapidly at lower cost through a collaborative focus on delivery optimisation. Seven will work transparently to identify and implement better ways of working

Shorten Delivery Cycle

- Program Office Manager involved in triage workshops to identify optimisation opportunities and enable appropriate PM resource allocation.
- PM involved in planning and delivery to accept delivery ownership, identify optimisation opportunities and minimise tier-creep.
- Secure dedicated resources from key delivery partners that are highly impacted to reduce dependencies and maintain priorities.

Reduce Cost

- To enable productive commencement of the initiative, the PM will be assigned once required resources (internal and external) are confirmed.
- A PM or PMO resource will confirm/lock in resources from internal and external delivery partners.

COPYRIGHT - SEVEN CONSULTING 2024 - ALL RIGHTS RESERVED

PMO/PM-as-a-Service – Generic Challenges

- Intellectual Property Delivery IP and skillset potentially leave with the delivery capability partner.
- 2. Costs Comparable cost to current capability where PMO/PM resources primarily contractors, so costs per day per resource should slightly increase. However, on starting PMO/PM as a service, the quality of project management and throughout should materially increase and therefore overall project costs should reduce.

Critical Success Factors for Transition

General

- Teamwork
 - Active and ongoing involvement/secondment in projects by appropriate subject matter experts (SMEs)
 - Ongoing support from business sponsors/stakeholders
- Transparency
 - Ability to openly and honestly share information between the organisations

Project Management Office

COPYRIGHT - SEVEN CONSULTING 2024 - ALL RIGHTS RESERVED

- Access to existing PMO/PM resources
- Adequate documentation on existing projects
- Appropriate tools in place to support Project Management Framework

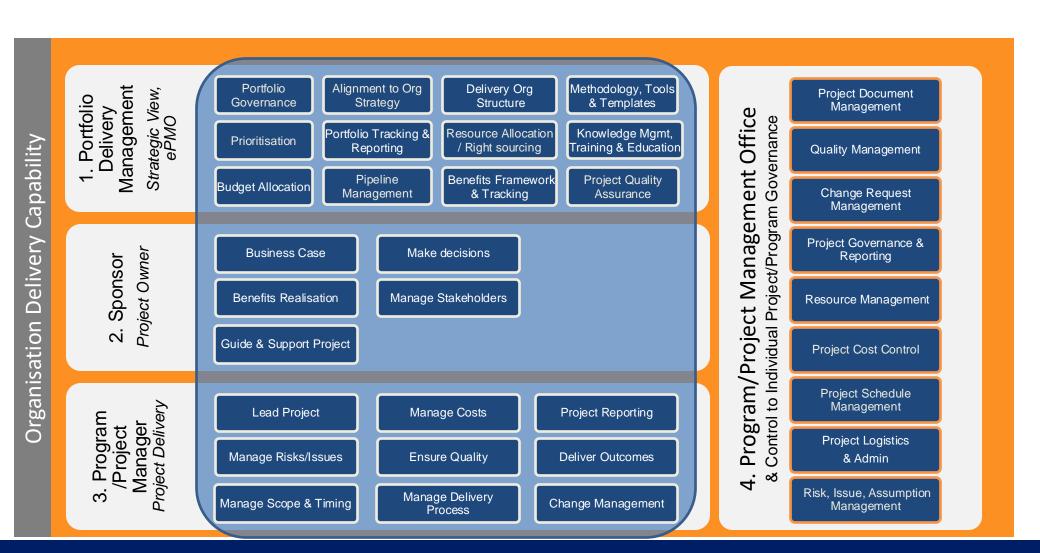

Project Management

Access to existing PM resources

Scoping of Your Needs

Scope could be determined from this selection:

PMO Implementation Timeline – Initial Engagement

A review will be required to ensure the client portfolio is properly understood and appropriately scoped, resulting in a considered timeline:

Identify and agree scope and governance

Identify key stakeholders

Review project portfolio

Scope ongoing support

Finalise Proposal

- Agree criteria for inclusion and exclusion
- Agree engagement checkpoints

- Program Managers
- Project Managers
- Head(s) of Delivery

COPYRIGHT – SEVEN CONSULTING 2024 – ALL RIGHTS RESERVED

- Existing PMO staff
- Enterprise PMO

- Assess breadth, scale and complexity
- Understand current PMO maturity and capability
- Understand Support Functions

- Identify services and service levels required
- Identify resource levels required to deliver above
- Finalise Resource Plan
- Draft Services Contract
- Draft SLAs
- Financial Model
- ImplementationPlan

PMO Implementation Timeline

Can implement services and generate effective benefits within the following timeframes.

Effectiveness Benefits	Within 6 Weeks	Within 10 Weeks
Implement active Issue, Risk, Dependency & Assumption Management	•	•
Estimate, Create, Update project plans (on a weekly / fortnightly cycle)	•	•
Implement active Change Request Management	•	•
Implement consistency in reporting (agreed format) which will enable "apples to apples" comparison of project status, thereby enabling identification of any true red projects	•	•
Implement consistent and regular financial and resource forecasting, supporting a portfolio view		•
Allocating lower-level project management tasks to a pool of trained administration staff	•	•
Creating a leveraged pool of PMO resources dedicated to functions, rather than dedicated to projects or programs	•	•
Increasing the use of specialist and/or PMO staff supporting the project managers, thereby allowing them to take on additional or larger projects eg scheduling		•

PM as a Service –Timeframe

Project Management transition

COPYRIGHT - SEVEN CONSULTING 2024 - ALL RIGHTS RESERVED

- Transition of the Project Management service would be cut over at a defined date to ensure continuity of project delivery and align with the completion of the PMO transition.
- Seven would assume responsibility for all existing contract PM resources and assess their suitability for retention.
- New initiatives would be resourced from Seven's PM resource pool.

PMO/PM Organisation

Delivery Director

Will have overall responsibility for the PMO and Delivery PM's

Program Management Office

- Will have a Program Office Manager in charge of the PMO, supported by a flexible resource pool of:
 - Master Schedulers
 - PMO Analysts
 - PMO Co-ordinators

With headcount dependant on the size and complexity of the project portfolio and the ability to offshore some of the low value tasks at a reduced cost

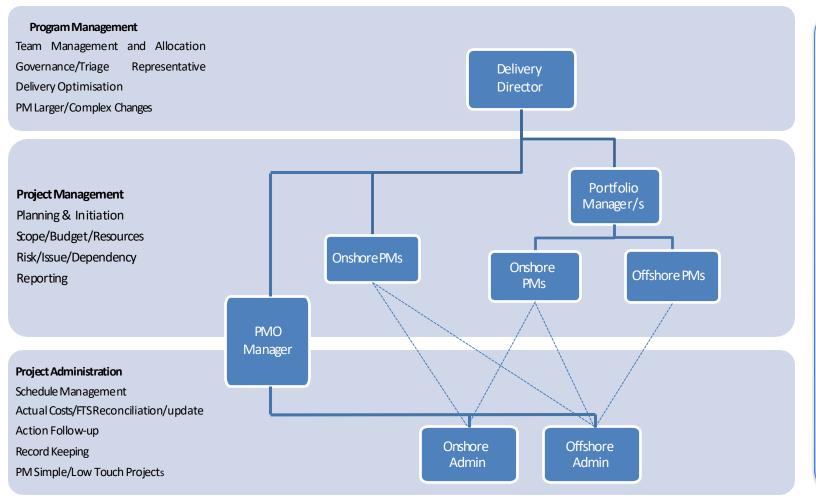

Project Management

- Portfolio/Program/Project Managers would be allocated dependant on project size and complexity.
- A Program Manager could be allocated to portfolio manage Project Managers running separate projects within a large initiative
- A Project Manager will be able to manage several small projects, with the potential for offshoring "Lite" projects to lower cost offshore resources

PMO/PM Organisation

 We will use a blend of on-shore, off-shore and temporary staff to optimise cost while reducing project delivery cycles over time

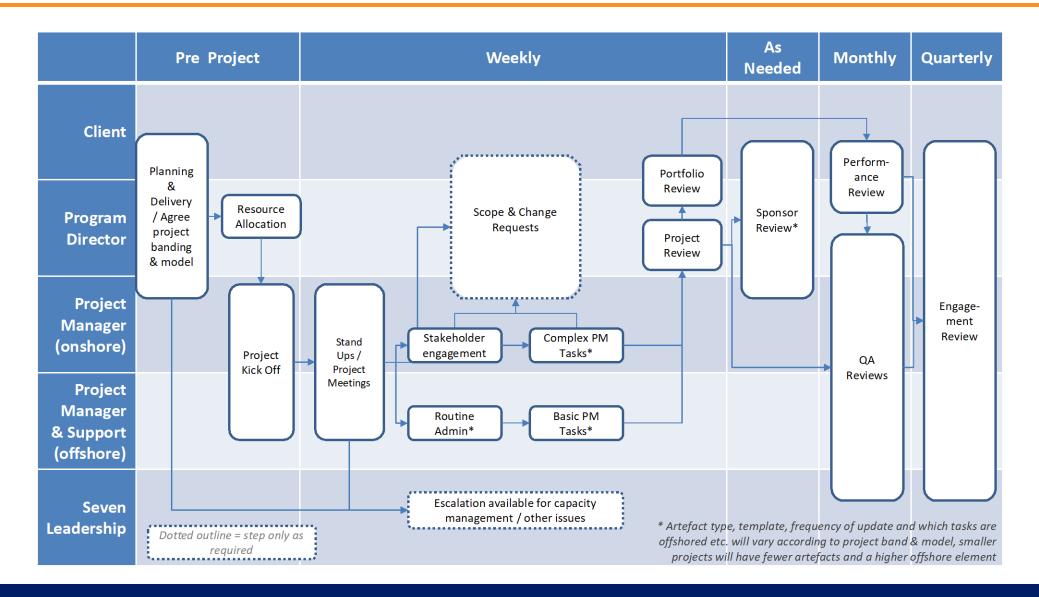

PMO/PM Organisation

COPYRIGHT – SEVEN CONSULTING 2024 – ALL RIGHTS RESERVED

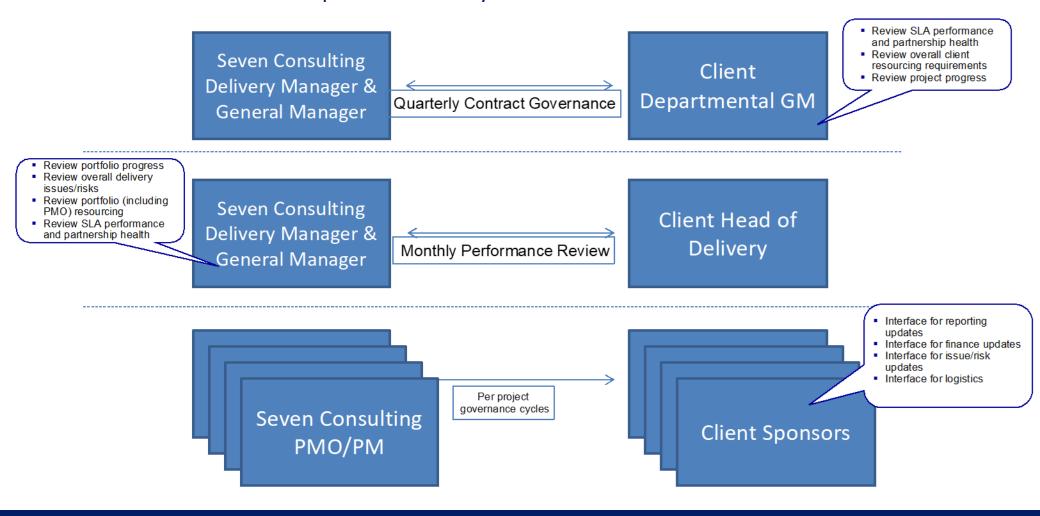

Governance and Partnership

 Whilst all projects will have their own Steering and governance structures, periodic reviews are recommended to review portfolio delivery:

COPYRIGHT – SEVEN CONSULTING 2024 – ALL RIGHTS RESERVED

ePMO As a Service

Providing ePMO functions through "as a Service" model

Indue established an ePMO in 2019 and implemented a centralised tool (PWA) in late 2021 with the aim of providing reliable reporting to their stakeholders. However, by 2023 they were still not achieving the value and visibility they needed across the circa 150 projects in their portfolio.

Seven Consulting were engaged to uplift and standardize Indue's ePMO so that it can be delivered "as a service". The ePMo was revamped as a Centre of Excellence, providing delivery governance support to Executives and an independent repeatable single source of truth for delivery and enterprise reporting.

The Seven team improved the integrity of the data and processes to facilitate more reliable reporting and transparency. Within 6 months, Indue found the ePMO services to be seamless and significantly improved the satisfaction of users (Executives, Project Managers and Resource Managers). Indue then engaged Seven Consulting to continue run the ePMO "as a Service".

Pricing approach

We charge for a service as a % of total project spend as opposed to T&M. The advantages of this include:

- Low overhead to administer. No need to keep timesheets.
- No need to adjust for CPI as total project spend will go up over time
- Easy to budget for projects as a set %.
- 4. Ability to scale up or down portfolio and Seven's role to manage the resource implications of that, fractions of resources, leave cover, illness, staff turnover etc. Just need to meet our service targets.
- Include in % a set amount of hours for process uplifts.
- 6. Availability of open book to ensure Seven making a reasonable profit, albeit approx 75% of normal margin.

Domain Services & Potential SLAs

Scope & Change Control Management

Domain: Change Control	Support projects in the capture and governance ofscope Change Requests		
Domain Description	Value Add		
 Project Scope Change Control is concerned with: Assessing the impact of potential scope changes Prioritising potential scope changes Determining a course of action for potential changes Project changes are modifications to the project scope or major changes to milestones as defined in the project baseline. 	 The scope change control process will ensure that changes to project scope and subsequent impacts on cost, and schedule receive proper recognition, analysis, and approval A consistent approach to scope change control ensures all projects are treatedfairly Scope change requests can be aggregated at a portfolio level to gaugepotential portfolio/capital budget impacts 		
Core Services (Medium and Full)	Deliverable/Output	SLAs	
 Document request in Scope Change Request Log Determine if request should be considered Determine & communicate disposition if request should not be considered Analyse the change and its impact if request will be considered Distribute assessment Determine and communicate final disposition Update project plans / budgets 	 Updated change log- Within 1 working day(Should be on a weekly cycle) Advise if agreed change control process needs to be pursued (updated change log) including impact of assessment effort Analyse change and its impact (updated change log) Communicate final disposition Update project plans 	 Within 1 working day (Should be on a weekly cycle) Within 2 working days of change request received. Within 10 days of submission (dependent on SME availability/effort required) Within 6 working days of submission By next planned schedule updates

Seven Consulting - Services

Program Delivery

We deliver some of Australia's most complex and challenging agile, traditional and hybrid programs. We work with our clients to understand their organisational and program characteristics. These inform how we design our delivery approach to produce the best outcome for our clients. The majority of our consultants are scaled agile (SAFe) certified and manage billions of dollars of transformation programs that range in size from <\$1m to >\$500m.

PMO Services

We provide PMO establishment and management, PMO analysis and scheduling services, and tools for some of the largest organisations in Australia. This can range from scheduling services, to running the PMO for \$1.5bn programs, to ePMO management.

All of our clients are reference sites

Seven Consulting – Products & Services

Change Management Services

We provide program change management, adding value from the start of an initiative through to realising benefits. We also support the integration of change management at an enterprise level to improve portfolio performance.

Delivery Consulting

We provide delivery capability uplift, sponsor and project manager training, portfolio and program reviews to assist our clients improve their program delivery. We have successfully provided these services to over 50 clients.

Delivery Tools

Seven Consulting has designed and developed world leading tools to assist our clients optimise their portfolio, design their delivery approach and provide deep weekly delivery insights. These tools are used successfully on over \$5bn of Programs annually.

All of our clients are reference sites

Our clients and team are our top priority

- Industry leading Customer Satisfaction and NPS management.
- Bench support available at no cost to client.
- Holidays and illness cover for clients.

Tools

- Dedicated project tools team.
- Program Delivery approach designed with Pathfinder.
- Delivery approach risks defined with Pathfinder.
- Schedule integrity measured with Healthcheck tool.
- Project reporting with dashboards and scorecards.
- Portfolio optimisation tool.

All our clients are reference sites.

How our values impact our delivery?

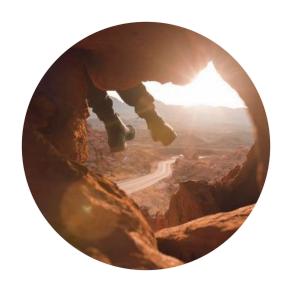

Teamwork

Teamwork has to be at the core because you can't deliver big projects without great teamwork. We focus on ensuring that the Seven team, the client team and vendors work seamlessly together.

Transparency

Assumptions and poor communications kill projects, whereas openness is the foundation of good relationships and reliable delivery. We remain a completely independent consultancy.

Delivery

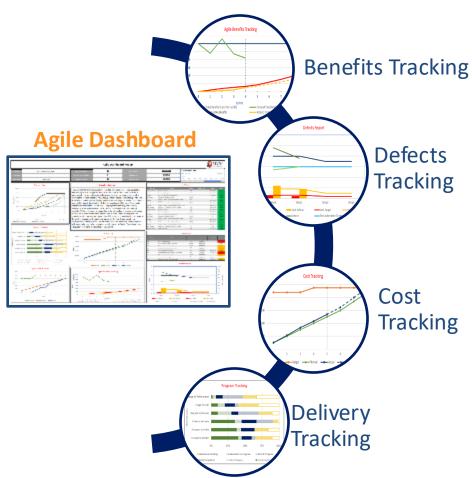

A strong emphasis on outcomes focuses the team and grows confidence. With a confident attitude, expert personnel and effective teams we always deliver to our client's high expectations.

Agile Program Delivery Tools

Seven Consulting's Project Pathfinder Tool provides guidance on how to tailor your program or project. It provides suggestions on agile or traditional methodology components to apply, operating practices to adopt and artefacts to prepare to deliver your program or project.

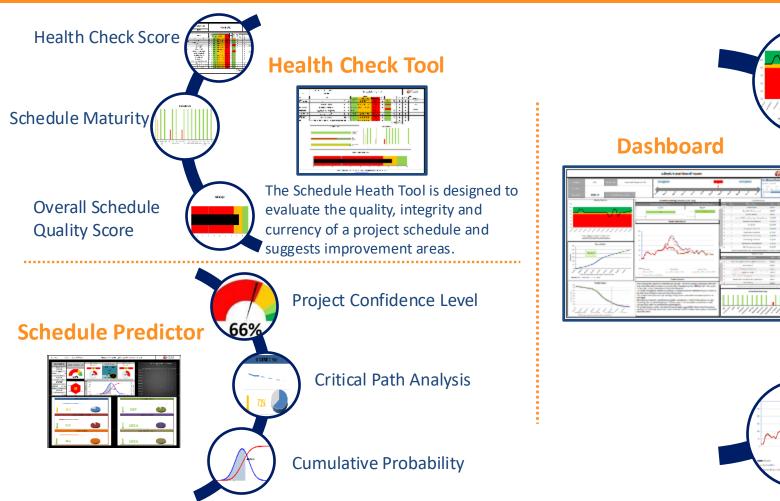

The Agile Dashboard combines a number of reports to provide a 'Dashboard', or snapshot of agile projects progress. These include Burn-up Chart, Sprint Burn Up, Cost Tracking, Benefits Tracking and Defect Reports.

Traditional Program Delivery Tools

Weekly Velocity

The Schedule Predictor Tool uses advanced algorithms to evaluate the precision of project forecast date and PM expectation finish date according to their actual performance. It provides a prediction trend line to suggest improvement areas.

Earned Value Task burndown **Effort Tracking** The Schedule Dashboard combines a number of reports to provide a 'Dashboard', or snapshot of agile projects progress.

These include Weekly velocity, Earned Value, Task burndown and Effort Tracking.

Improve Project Success Rates with Pathfinder

- 1. Follow a consistent approach to customise and optimise project delivery based each project's and organisation's key characteristics.
- 2. Reduce the level of project management oversights or omissions.
- 3. Identify delivery approach risks and mitigants.
- 4. Create a draft schedule in MS project or JIRA with streams, phases, deliverables, tasks and dependencies.
- 5. Enable better project outcomes.

Portfolio Optimisation Tool

Our Portfolio Optimisation Tool

can be used to prioritise projects, calculate changes to capacity and reshape your project portfolio working within configurable constraints like budget, resourcing, environments and SMEs.

Our tool can also produce graphs of projects according to their business priority versus their deliverability. These graphs can be very helpful in visualising the data and promoting the key discussions on projects within your portfolio.

Portfolio Optimisation Tool

Our projects so far:

2007Villawood Detention Centre (Sydney)

2008South Australian Detention Centre (Sydney)
